Aj Smith
Software Engineer

SUMMARY

Dynamic and adaptable Junior Developer with over a decade in administrative and professional roles, now fully transitioned into tech with hands-on expertise in full-stack development and agile methodologies. Eager to leverage strong problem-solving abilities, collaborative skills, and creative approach to contribute effectively within a development team. Passionate about building efficient, user-centered applications, improving code functionality, and actively supporting team projects with a resilient and solution-oriented mindset.

WORK EXPERIENCE

Software Engineer | AnnieCannons | San Francisco, CA (Remote)

March 2024 — Present

- Developed and deployed full-stack applications, utilizing JavaScript, HTML, CSS, and backend technologies to solve real-world client problems.
- Worked collaboratively in a team of developers to build and test features, resolve bugs, optimize performance and deliver projects on time.
- Led peer coding sessions and in person events, enhancing team collaboration and technical proficiency in debugging and code optimization.
- Participated in code reviews and applied feedback to improve code quality, ensuring adherence to best practices.

Recent Projects:

Portfolio Project – Developed a professional portfolio using HTML, CSS, and JavaScript to highlight projects, incorporating interactive elements and user-friendly navigation. Ensured cross-browser compatibility and responsive design, delivering a seamless experience for prospective employers and collaborators. Included a fully functional contact form.

Tic-Tac-Toe Web Game – Developed a game based off of a Figma design, provided by a client. Fully functional game where the user plays against the CPU. With a tally score and game reset option for multiple game options.

Horoscope Web App – Built a responsive web page with HTML, CSS, and JavaScript that enables users to select their sun sign and view a personalized horoscope. Designed for seamless integration with a horoscope REST API.

Other Projects: Web App with NASA API integration, React Web App with responsive bento css grid design
